

NIKIFOROS KARAPATAKIS

COMPUTER SCIENCE STUDENT

CONTACT

- 6908278317
- nikarapatakis@hotmail.com
- Makris 51, Keratsini

SKILLS

Technical Skills:

- Java
- Python (Seminar)
- HTML / CSS
- PHP
- SQL (Basic)
- VSCODE
- GitHub
- Git

Soft Skills:

- Analytical Thinking
- Crisis Management
- Collaborative Problem Solving

LANGUAGES

- English (C2)

VOLUNTARY WORK

Voluntary Firefighter

- Crisis Management & Decision Making:** Executed emergency responses under extreme pressure, demonstrating rapid analytical thinking and strict adherence to safety protocols.
- Team Coordination:** Collaborated with diverse, multi-functional teams to manage complex rescue operations and high-stakes missions.

PROFILE

Computer Science student specializing in Java, Python, and Full-Stack development. Combines technical proficiency with high-pressure decision-making and crisis management skills developed as a Volunteer Firefighter. Proven track record in building scalable applications and collaborating in fast-paced environments.

WORK EXPERIENCE

- Electronic Equipment Assembler / CC LIT** 27/05/2024 - 30/09/2024
- Assistant Surveyor / AKSM (Riviera Tower Project)** 18/02/2025 - 31/05/2025
- Customer Service & Fleet Management Agent / Avis** 07/06/2025 - 30/09/2025

EDUCATION

- BSc (Hons) Computer Science University of East London (via Metropolitan College)** Oct 2024 - Currently
 - Performance:** Consistently achieving distinction grades (>90%) in core technical modules.
 - Key Coursework:** Web Technologies, Algorithms, Data Structures, Software Engineering.

PROJECTS

Coffee Shop Management System | Java

- System Architecture:** Developed a Java-based console application to automate point-of-sale (POS) operations, including menu navigation, order processing, and transaction management.
- Data Optimization:** Leveraged the Java Collections Framework (HashMaps) to ensure efficient data retrieval and storage of product information, achieving O(1) time complexity for menu lookups.
- Functional Logic:** Engineered a modular command-line interface (CLI) with integrated features for real-time order tracking and automated checkout calculations.

Full-Stack Gaming Community Platform | PHP, SQL, JavaScript

- Dynamic Content Management:** Engineered a custom media gallery using PHP and MySQL, allowing users to perform CRUD operations (Create, Read, Update, Delete) for image uploads and content management.
- Database Architecture:** Designed and implemented a relational database schema to ensure data integrity and efficient retrieval of user-generated content.
- Front-end Integration:** Developed a responsive UI with HTML/CSS and JavaScript, ensuring cross-browser compatibility and seamless user experience for the team's community.
